## ENVIRONMENTAL ASSESSMENT ACT

### O. Reg. 1/90.

Exemption—Ministry of the  
Environment—MOE-41.

Made—December 13th, 1989.

Approved—December 13th, 1989.

Filed—January 3rd, 1990.

## ORDER MADE UNDER THE ENVIRONMENTAL ASSESSMENT ACT

### EXEMPTION—MINISTRY OF THE ENVIRONMENT—MOE-41

Having received a request from the Regional Directors of the Ministry of the Environment that an undertaking, namely:

activities related to clean-up and/or remedial work being carried out by the Ministry of the Environment as a result of the default of a person or company ordered to carry out such work under the *Environmental Protection Act* or the *Ontario Water Resources Act*

be exempt from the application of the Act pursuant to section 29; and

Having been advised by the Regional Directors of the Ministry of the Environment that if the undertaking is subject to the application of the Act, the following injury, damage or interference with the persons and property indicated will occur:

- A. The exemption applies to emergency situations which present an immediate threat or danger to public health or safety or to the environment.
- B. The time required to prepare environmental assessments and seek approval under the *Environmental Assessment Act* would significantly delay the implementation of the undertaking, thereby exacerbating the threat or danger to public health or safety or to the environment.

Having weighed such injury, damage or interference against the betterment of the people of the whole or any part of Ontario by the protection, conservation and wise management in Ontario of the

environment which would result from the undertaking being subject to the application of the Act;

The undersigned is of the opinion that it is in the public interest to order and orders that the undertaking is exempt from the application of the Act for the following reasons:

- A. The activities involved in the undertaking will result in minimizing the potential for the injury and damage which are stated above.
- B. The various instructions, approvals and orders which may be issued under the *Environmental Protection Act* and the *Ontario Water Resources Act* will result in these activities being carried out in a safe manner.

This exemption is subject to the following terms and conditions:

1. Where an undertaking, which is being carried out under this exemption order, is the subject of another exemption order, or is an undertaking for which an environmental assessment has been accepted and approval to proceed received, the undertaking shall be subject to the terms and conditions of this exemption order, and any other terms or conditions of an exemption or approval shall not apply.
2. A report, describing the activities carried out as a part of any clean-up and/or remedial work which is carried out under this exemption order, shall be prepared by the Director of the appropriate Regional Office of the Ministry of the Environment and this report shall be filed with the Director of the Environmental Assessment Branch for filing on the public record, within thirty days of the completion of such work.
3. This exemption expires the earlier of:
  - (a) three years from the date of its approval; or
  - (b) the date on which a Regulation, which exempts this undertaking, comes into force,

1. Where any activity which otherwise would be exempt under this order is being carried out as or is part of an undertaking for which an environmental assessment has been accepted and approval to proceed received, the activity shall be carried out in accordance with any terms or conditions in the approval to proceed as well as the conditions of this order.
2. Where any activity which is the subject of this order is being carried out as or is part of another undertaking which is the subject of an exemption order under the Act, the activity exempt under this order shall be carried out in accordance with any terms or conditions in the other exemption order as well as the conditions in this order.
3. This Order replaces Exemption Orders MGSA-1, MGSC-3 and MGSD-4 published in the Ontario Gazette on November 13, 1976 and MGS-64 filed as Ontario Regulation 257/86, which are hereby revoked.
4. The activities referred to in paragraphs (4), (5), (6), (7), (8), (9) and (10) of the description of the undertaking under this order shall not be implemented if they will conflict with any provision of a zoning by-law or other similar land use control under the *Planning Act, 1983, Niagara Escarpment Planning and Development Act, Parkway Belt Planning and Development Act* and the *Ontario Planning and Development Act* unless such change is made to put the property in a safe condition.
5. (1) For the purposes of Condition 4 as it applies to additions or replacement under paragraph 6 of the description of the undertaking for greater than 50 per cent of the current operational capacity of the facility or as it applies to paragraph 7, a provision in a zoning by-law or other similar land use control which gives a general authorization for all types of government uses shall be disregarded.
  - (2) Subcondition 5 (1) does not prevent the construction and use of administrative facilities in a non-residential area or of buildings of a type the official plan allows to be constructed for the private sector.
6. The carrying out of activities described in paragraph (1) of the description of the undertaking shall not be used by the Ministry of Government Services to justify any particular undertaking which may involve the property in question, nor shall it be given any weight in decisions that must be made under the *Environmental Assessment Act* on any undertakings.
7. The activities referred to in paragraph (1) of the description of the undertaking are not exempt where the acquisition is for disposal unless the disposal is related to meeting the objectives of the "Housing First" policy or to small parcels adjacent to currently owned lands and the purpose is to round out those currently owned lands and that the intended use of these lands is not subject to the *Environmental Assessment Act*.
8. (1) MGS shall include in its feasibility studies the identification of all environmentally significant areas. The identification shall involve, where appropriate,
  1. Contact with MNR District and Regional staff;
  2. Contact with Conservation Authority staff;
  3. Contact with the Niagara Escarpment Commission staff;
  4. On-site surveys by environmental consultants; and
  5. The consideration of information received from any party regarding the existence of habitats for threatened, rare, or endangered species.
- (2) MGS shall ensure throughout its feasibility studies that no activities referred to in paragraphs (1) to (10) of the description of the undertaking shall negatively impact the state of environmentally significant areas. If such feasibility studies reveal that any environmentally significant areas are potentially adversely impacted by any of the proposed activities in this Order, then an environmental management plan shall be incorporated into the feasibility studies which shall ensure that the state of any environmentally significant areas shall be maintained or improved. Such environmental management plans shall address, where appropriate, surface and groundwater quality and quantity, soil management, noise, air emissions, habitat preservation and management, public access, heritage preservation and integration and environmental monitoring.
- (3) Where MGS proposes to proceed with an activity under this Order and a feasibility study was completed before the date of the Order that did not address the matters required to be addressed by subcondition 8 (2), a supplementary feasibility study that satisfies the requirements of subcondition 8 (2) shall be carried out.
- (4) MGS shall comply with any environmental management plan and supplementary feasi-

- bility study referred to in subconditions 8 (2) and 8 (3), as it may be amended from time to time.
9. The activities referred to in paragraph (2) of the description of the undertaking are not exempt with respect to Environmentally Significant Areas except where the sale, granting or other disposal is to a public or non-profit agency which will agree to use such land for conservation purposes only and there are provisions in an official plan and zoning by-law restricting the use of the land to conservation purposes only.
  10. When heritage resources are identified as significant in this interim period through existing arrangements and protocols, MGS shall avoid adverse impact on these resources. MGS shall also consult with the Ministry of Culture and Communications with the intent of establishing a process to identify heritage resources in MGS's inventory of real property.
  11. The additions referred to in paragraph (6) of the description of the undertaking for the Ministries of Community and Social Services, Health, and Correctional Services that are not administrative facilities will be limited to increases not greater than 50 per cent of the current operational capacity of the facility.
  12. The activities referred to in paragraph (8) of the description of the undertaking are exempt only for projects where a substantial component is residential development.
  13. Where MGS proposes to carry out an activity of a type that if carried out by a municipality would be an activity in the Class Environmental Assessment for Municipal Roads Projects or the Class Environmental Assessment for Municipal Sewer and Water projects or if carried out by Ontario Hydro would be an activity described in the Class Environmental Assessment for Minor Transmission Facilities (copies of which are located in the public records established under section 31 of the Act), then MGS may only carry out the activity if it has followed the same procedures as a municipality or Ontario Hydro would have had to follow under their respective environmental assessments and if as a result of applying the relevant environmental assessment a municipality or Ontario Hydro would have had to perform an individual environmental assessment for such activity, the activity is not exempt under this Order.
  14. Any structure which would be subject to the *Building Code Act* if built by a private person shall be subject to the requirements of the *Building Code Act*.
  15. For the purposes of conditions 4 and 14, the listed statutes shall be treated as though they bound the Crown.
  16. The activities referred to in paragraph (9) of the description of the undertaking shall comply with any relevant Canadian Standard Association standards and regulations of the Federal Department of Transport.
  17. Where MGS is carrying out an activity under this Order, it shall review the environmental history of the lands and shall ensure that such tests are conducted as a reasonable and prudent buyer, landowner or developer would do given the history and intended use of the lands. If such tests reveal concentrations of contaminants in excess of the criteria and parameters contained in the "Guidelines for the Decommissioning and Cleanup of Sites in Ontario" (MOE Policy 14-17-01), MGS shall follow the procedures outlined in that Policy in order to ensure that the decommissioning and cleanup of the site is completed in an environmentally acceptable manner before the activities being carried out under this Order are completed.
  18. The Ministry of Government Services shall provide copies of the Functional Program Description or a similar document prepared for the project which includes location, environmental concerns and public and agency contacts where appropriate to the Environmental Assessment Branch for activities referred to in paragraphs (7), (8), (9) and (10) of the description of the undertaking. Such descriptions will be submitted at least sixty days prior to implementation of any project. For proposed applications under the *Planning Act, 1983* permitting substantial changes in use, the Ministry of Government Services shall submit a Background Report to the Environmental Assessment Branch containing a description of, and rationale for, the project and a summary of its impacts. Any environmental management plan and supplementary feasibility study referred to in subcondition 8 (4) shall be submitted to the Director, Environmental Assessment Branch, and the appropriate Regional Office of the Ministry of the Environment.
- For proposed activities under paragraph 2, involving real property in excess of 100 acres for any one undertaking, where such real property has not been subjected to the *Planning Act, 1983*, the Ministry of Government Services shall submit, at least sixty

days prior to implementation, a background report to the Environmental Assessment Branch of the Ministry of the Environment, containing a description of, and rationale for, the sale, granting or other disposal of real property and leaseholds. This requirement will not apply to the disposal of farmland where the proposed use is farming.

19. Within forty-five days of receiving notification from MGS under Condition 18 or within forty-five days of receiving additional information under this condition, the Minister of the Environment may, by written notice to the Minister of Government Services which outlines his reasons:

- (1) direct that an environmental assessment be prepared for the project, in which event the project will not be exempt under this Order; or
- (2) advise that the project may proceed with or without conditions; or
- (3) request additional information, in which event the project cannot proceed until the Minister or Director of the Environmental Assessment Branch gives written notice to proceed with or without conditions.

No response within forty-five days indicates that the project may proceed under this Order.

20. The Ministry of Government Services shall diligently prepare and process the Class Environmental Assessment referred to in reason C above and submit it to the Minister of the Environment not later than eighteen months from the date this Order is filed with the Registrar of Regulations.
21. This Order terminates on the earlier of either: two years from the date this Order is filed with the Registrar of Regulations, or the date the approval issued with respect to the Ministry of Government Services' Class Environmental Assessment referred to in Reason C comes into effect.
22. In this Order, the following words have the meanings given for them:

## ENVIRONMENTAL ASSESSMENT ACT

**O. Reg. 3/90.**

Compliance Order—Ministry of Natural Resources—MNR-C-1.

Made—December 21st, 1989.

Approved—December 21st, 1989.

Filed—January 3rd, 1990.

## ORDER MADE UNDER THE ENVIRONMENTAL ASSESSMENT ACT

### COMPLIANCE ORDER—MINISTRY OF NATURAL RESOURCES—MNR-C-1

Having received a request from the Ministry of Natural Resources that an order be issued with respect to an undertaking, namely:

The primary access roads in the Latchford Crown Forest Management Unit approved by the approval (the "Approval") issued under section 14 of the Act by the Minister of the Environment dated June 17, 1988, a copy of which is in the public records maintained under section 31 of the Act,

pursuant to section 29, in order to ensure that certain mitigation measures with respect to completion work are carried out; and

Having been advised by the Ministry of Natural Resources that it has completed the connection proposed to be provided by the Red Squirrel Road Extension, part of the undertaking, but it has been unable to entirely complete the said extension, including all mitigation measures related to its establishment as required by condition 28 of the Approval, since factors beyond the control of the Ministry of Natural Resources delayed completion into the beginning of winter when seasonal factors prevent effective completion of mitigation measures;

Having been advised by the Ministry of Natural Resources that if the undertaking is subject to the application of the Act, the following injury, damage or interference with the property and persons indicated may occur:

- A. If, before December 31, 1989, with existing snow depths and frozen ground conditions, M.N.R. completes remaining measures required by the terms and conditions of approval to be completed by December 31, 1989, such as ditch and culvert cleaning, seeding operations and placement of a rock screen in the Pencil Lake area, the measures will be ineffective and could result in environmental damage to Crown land and fish habitat in the area of the Red Squirrel Road Extension.
- B. Any delay in obtaining access to timber stands intended to be accessed by the Red Squirrel Road Extension, caused by inability to effectively complete remaining measures required by the terms and condition of approval, may

— jeopardize the economic viability of the local forest industry by resulting in loss of direct and indirect employment,

- have negative effects on other business in the area, and
- have negative effects on local communities and local communities may cease to be viable in both economic and social terms.

Having weighed such damage or interference against the betterment of the people of the whole or any part of Ontario by the protection, conservation and wise management in Ontario of the environment which would result from the above aspect of the undertaking being subject to the application of the Act;

The undersigned is of the opinion that it is in the public interest to order and orders that the undertaking is exempt from the application of the Act in so far as it is necessary to enable completion, maintenance and operation of the Red Squirrel Road Extension with all the mitigation measures required by the Approval effectively completed for the following reason:

- A. Although the proponent was unable to complete the road with all the mitigation measures in the time provided for in the approval for reasons beyond the control of the Ministry of Natural Resources, the road was substantially completed and can be used and it is desirable to ensure that completion in accordance with the mitigation measures is carried out.

This order is subject to the following terms and conditions:

1. Notwithstanding the provisions of condition 28 of the Approval, the Ministry of Natural Resources shall complete the construction of the Red Squirrel Road Extension with implementation of all mitigation measures related to its establishment which the Ministry of Natural Resources was unable to complete by December 31, 1989, by no later than July 31, 1990, or such other date as the Minister of the Environment specifies in writing, and in the event that the nature of any of the mitigation measures requires continuing work after that date in order for the mitigation measures to be effective, the Ministry of Natural Resources shall carry out such work.
2. The Ministry of Natural Resources shall not permit trucks to use the Red Squirrel Road Extension to haul logs until it has filed written notice with the Environmental Assessment Branch indicating that, in the opinion of the Minister of Natural Resources, the

mitigation measures have been completed so as to effectively deal with the adverse effects of truck operation in accordance with the purpose of the measures.

3. Except with respect to timing issues referred to above, this order does not affect the application of any other part of the Approval to the undertaking. O. Reg. 3/90.

Having been advised that if the undertaking is subject to the application of the Act, the following injury, damage or interference with the persons and property indicated will occur:

- A. The proponent and its customers will be damaged and interfered with by the undue expense required to prepare an Environmental Assessment for an undertaking which will have only minimal effects on the environment.
- B. The City of Waterloo will be damaged and interfered with as it will be necessary to restrict development in the north and west sections of the City.

Having weighed such damage or interference against the betterment of the people of the whole or

any part of Ontario by the protection, conservation and wise management in Ontario of the environment which would result from the undertaking being subject to the application of the Act;

The undersigned is of the opinion that it is in the public interest to order and orders that the undertaking is exempt from the application of the Act for the following reasons:

- A. The proponent has prepared an Environmental Study Report that demonstrates that the environmental effects of construction and operation of the transformer station will be very limited and not adverse.
- B. The public and property owners have been made aware of the proposed construction of the transformer station and the proponent advises that there are no public concerns.
- C. The proponent has carried out pre-submission consultation with the Ministry of the Environment, and circulated the following Ministries for comment: Citizenship and Culture, Natural Resources, Agriculture and Food. Contact with these Ministries will be maintained throughout the construction stage of the undertaking.

This exemption is subject to the following terms and conditions:

1. This exemption shall expire if construction is not commenced by January 1, 1993.
- 2.—(1) The maximum design levels for noise at the point of reception shall be established in accordance with the Ontario Hydro "Protocol for Community Noise Control", January 7, 1981.
- (2) The noise level of the power transformers to be installed will be tested by Waterloo North Hydro in accordance with the Canadian Standards Association publication CAN3-C88-M79.
- (3) If the tests under subcondition (2) establish that the facility noise level exceeds the design levels established in subcondition (1), a noise mitigation study outlining the proposed mitigation measures to reduce the noise impact shall be submitted to the Director, Approvals Branch, Ministry of the Environment, for approval. Approved mitigation measures shall then be undertaken by Waterloo North Hydro forthwith.
- (4) The noise level of the power transformers shall be tested by Waterloo North Hydro from time to time to ensure compliance with the maximum design level established in subcondition (1).

3. The design and implementation process for the facility will be carried out by Waterloo North Hydro according to the Environmental Study Report and recommendations contained therein; and will be made known by Waterloo North Hydro to the public government agencies and property owners in the area.
4. Mitigation of any adverse environmental effects during construction shall be undertaken by Waterloo North Hydro in accordance with section 4 of Ontario Hydro's "Environmental Guidelines for the Construction and Maintenance of Transmission Facilities (1986)".
5. Where any activity which otherwise would be exempt under this order is being carried out as or is part of an undertaking for which an environmental assessment has been accepted and approval to proceed received, the activity shall be carried out in accordance with any terms or conditions in the approval to proceed as well as the conditions of this order.
6. Where any activity which is the subject of this order is being carried out as or is part of another undertaking which is the subject of any exemption order under the Act, the activity exempt under this order shall be carried out in accordance with any terms or conditions in the other exemption order as well as the conditions in this order.
7. Within thirty days of completing construction and again within thirty days of completing the approved mitigation measures, if any, the proponent shall submit a report to the Director of the Environmental Assessment Branch, Ministry of the Environment, outlining how conditions one through four were met. ## ENVIRONMENTAL ASSESSMENT ACT

**O. Reg. 24/90.**

Exemption—Ministry of Natural Resources—MNR-55.

Made—January 12th, 1990.

Approved—January 12th, 1990.

Filed—January 19th, 1990.

ORDER MADE UNDER THE  
ENVIRONMENTAL ASSESSMENT ACT

EXEMPTION—MINISTRY OF NATURAL  
RESOURCES—MNR-55

Having received a request from the Minister of Natural Resources that an undertaking, namely:

The activity of constructing a new Visitor Centre in Algonquin Provincial Park,

be exempt from the application of the Act pursuant to section 29; and

Having been advised by the Ministry of Natural Resources that if the undertaking is subject to the application of the Act, the following injury, damage or interference with the persons and property indicated will occur:

- A. The Ministry of Natural Resources and the public will be damaged by the unnecessary time and expense of having to prepare and submit an Environmental Assessment for an activity which is expected to have minimal negative impacts on the environment.

Having weighed such injury, damage or interference against the betterment of the people of the whole or any part of Ontario by the protection, conservation and wise management in Ontario of the environment which would result from the undertaking being subject to the application of the Act;

The undersigned is of the opinion that it is in the public interest to order and orders that the undertaking is exempt from the application of the Act for the following reasons:

- A. The public has had several opportunities to review and provide input to the planning for the Visitor Centre, including the 1979 Review of the Algonquin Park Master Plan, and the ongoing review of the Algonquin Park Management Plan, and no concerns have been raised.
- B. Construction of the Visitor Centre must commence in the spring of 1990 in order to be completed in time for the 1993 Centennial Celebration for Algonquin Park, the "flagship" of Ontario's provincial park system.
- C. The Visitor Centre will provide important recreation and public education benefits to park visitors.
- D. The Ministry of Natural Resources will construct the Visitor Centre in a manner to minimize any potential negative impacts on the environment.

- E. The purpose of this Order is only to exempt a capital construction project costing in excess of \$2,000,000 which, except for the cost, would otherwise be exempt by MNR-30/9 filed as O. Reg. 87/89.

This exemption is subject to the following terms and conditions:

1. The Ministry of Natural Resources shall conduct such studies as are necessary to determine the preferred methods of providing sewage and water services to the proposed site and submit these studies and appropriate applications to the Ministry of the Environment for approval prior to construction.
2. Construction wastes generated by the construction activities shall be disposed of in accordance with MNR Construction and Mitigation Guidelines and the MNR Class EA for Solid Waste Disposal.
3. The Ministry of Natural Resources will notify, in writing, the Environmental Assessment Branch, as well as the appropriate Regional Office of the Ministry of the Environment, of the date it is intending to commence construction of the Visitor Centre. Such notice shall be given at least forty-five days in advance of the commencement of construction.
4. A copy of the project plan will be available to the public for examination at the Algonquin Park District Office, the Regional Office of the Ministry of the Environment and the Environmental Assessment Branch of the Ministry of the Environment at least forty-five days before the commencement of construction.
5. This Exemption Order expires December 31, 1991, unless the construction of the Visitor Centre commences prior to this date, in which event it shall continue to apply until the project is completed.
6. Where any activity which otherwise would be exempt under this Order is being carried out as or is part of an undertaking for which an environmental assessment has been accepted and approval to proceed received, the activity shall be carried out in accordance with any terms or conditions in the approval to proceed as well as the conditions of this Order.
7. Where any activity which is the subject of this Order is being carried out as or is part

of another undertaking which is the subject of an exemption order under the Act, the activity exempt under this Order shall be carried out in accordance with any terms or conditions in the other exemption order as

well as the conditions in this Order. O. Reg. 24/90.

## REGULATION TO AMEND ONTARIO REGULATION 491/89 MADE UNDER THE

## ENVIRONMENTAL PROTECTION ACT

### 1. Section 3 of Ontario Regulation 491/89 is amended by adding thereto the following subsections:

(11) In addition to complying with subsection 3 (19) of the General Effluent Monitoring Regulation, each direct discharger shall use only sampling equipment for the collection of samples, the wettable surfaces of which are made of fluorocarbon resins, glass, stainless steel, high or low density polyethylene, polyethylene terephthalate, polystyrene or polypropylene for samples that are to be analyzed for parameters in analytical test groups M1 to M8 as set out in the Schedules to this Regulation.

(12) Despite subsection (11), a direct discharger may use sampling devices that contain a short section of surgical grade silicone rubber tubing or other tub-

ing approved by the Director if such tubing cannot be replaced by a material mentioned in subsection (11) without impairing the operation of the device.

(13) For the purposes of subsections 3 (22), (25a) and (26) of the General Effluent Monitoring Regulation,

- (a) a sample collected for analysis for parameters in more than one analytical test group as set out in the Schedules to this Regulation is deemed to be a sample collected for analysis for parameters in more than one analytical test group in Schedule 1 to the General Effluent Monitoring Regulation; and
- (b) a laboratory sample container specified in Column 2 of Schedule H to this Regulation is deemed to be a laboratory sample container specified in Column 2 of Schedule 2 to the General Effluent Monitoring Regulation.

(14) Instead of the minimum sample volumes specified in Column 5 of Schedule H, a direct discharger may, in relation to a sample to be analyzed, submit to the laboratory performing the analysis the minimum sample volume required by the laboratory to meet the analytical method detection limits set out in Column 6 of Schedule 1. O. Reg. 44/90, s.1.

- 2. Subsection 4 (1) of the said Regulation is amended by striking out "by the day on which a report is required to be submitted by that discharger under subsection 14 (1)" in the first, second and third lines.
- 3. Schedule A to the said Regulation is revoked and the following substituted therefor:

### ORDER MADE UNDER THE ENVIRONMENTAL ASSESSMENT ACT

**EXEMPTION—CITY OF  
BRANTFORD—BRAN-C-1**

Having received a request from The Corporation of the City of Brantford (the "City") that an undertaking, namely:

the activity of developing its Northwest Industrial Area, an area of some 625 ha (1,500 acres) providing for mixed industrial use on a range of lot sizes,

be exempt from the application of the Act pursuant to section 29; and

Having been advised by the City that if the undertaking is subject to the application of the Act, the fol-

lowing injury, damage or interference with the persons and property indicated will occur:

- A. The City needs new industrial land in the short-term. If the undertaking were subject to an individual environmental assessment, then there would be delays which would be injurious to the economy of Brantford. In addition, the well-being of the ratepayers of the municipality would be damaged due to the lack of new employment opportunities. The lack of provision of new industrial lands would interfere with continuing economic growth and prosperity.
- B. The City has provincial funds available up until 1994 to assist it with the development of the Northwest Industrial Area and will not be able to fully utilize these funds if required to obtain approval under the *Environmental Assessment Act*.

Having weighed such injury, damage or interference against the betterment of the people of the whole or any part of Ontario by the protection, conservation and wise management of the environment of Ontario which would result from the undertaking being subject to the application of the Act, the undersigned is of the opinion that it is in the public interest to order and orders that the undertaking is exempt from the application of the Act for the following reasons:

- A. The area has been the subject of numerous local and provincial studies and was selected as an area for future development during the Brantford boundary negotiations. Official Plan policies also designate the area for industrial uses. The principle of industrial development in this area is well researched and the basic development and servicing concepts are well within conventional development practice in Ontario. Previous studies have not only addressed environmental concerns but have also addressed the issues of marketability and design, development costs and financial implications relating to the development of the Northwest Industrial Area.

The previous studies undertaken have addressed a broad range of alternatives including: alternative areas for development, alternative design concepts, alternatives for the provision of services to the area and alternative servicing standards. An extensive public and agency consultation program has been included in previous studies conducted and will continue to be a vital component of the current studies.

- B. Detailed studies on all servicing and development issues will be required as part of the secondary plan and draft plan approvals process. The City will comply with all the

pertinent requirements of the *Planning Act, 1983*.

- C. Several of the activities anticipated as part of the development of this area of Brantford are covered by existing Class Environmental Assessments, specifically the trunk sewer extension, water trunk extension, booster pumping station, reservoir construction and road reconstruction. The Class Environmental Assessment for Municipal Road Projects and the Class Environmental Assessment for Municipal Sewage and Water Projects will be followed.
- D. Local environmental impacts will be addressed in the preparation of the secondary plan, which will be developed in conjunction with the Interministerial Committee.

This exemption is subject to the following terms and conditions:

1. The City shall contact Provincial and local review agencies to establish their interest in the planning and development of the Northwest Industrial Area and provide information to the Director of the West Central Region of the Ministry of the Environment on how the identified concerns will be addressed in the Secondary Plan and servicing studies.
2. The City shall conduct public meetings on the subject of the development of this area in accordance with the requirements of the *Planning Act, 1983* and provide information to the Director of the West Central Region of the Ministry of the Environment on how identified concerns will be addressed by policies or conditions of approval.
3. The City shall prepare a secondary plan under the *Planning Act, 1983* with background studies to address issues and concerns identified, and circulate those documents to concerned agencies for comment. Specific studies will include:
  - existing land use and socio-economic conditions in surrounding areas;
  - existing and proposed aggregate mining activities;
  - traffic and circulation;
  - natural environment;
  - cultural and heritage environment;
  - development opportunities and constraints;

- proposed land use;
- proposed circulation system, servicing system, master drainage plan and grading;
- proposed measures to avoid or reduce effects on adjoining properties and features of the natural or heritage environment.

4. The City shall prepare a draft plan of subdivision for lands under its control which are intended for development, consult with concerned agencies and enter into necessary agreements for the development of those lands.
5. The City shall proceed with the planning and development of sewage and waterworks in accordance with the appropriate Class Environmental Assessment.

The City will follow the requirements of the Class Environmental Assessment for Municipal Sewage and Water Projects as prepared by the Municipal Engineers Association.

6. The City shall consolidate and summarize the cumulative effects of development activities on the site and for the supporting off-site infrastructure for agency and public review through both the secondary plan documents and the Class Environmental Assessment documents.
7. The City may not proceed under this Exemption Order unless construction commences by 1994.
8. The proponent shall advise the Director of the Environmental Assessment Branch on how the conditions of exemption have been met within six months of the approval of this order. Should there be outstanding work, the proponent will continue to advise the Director of the Environmental Assessment Branch on how the conditions of exemption have been met.
9. Where a project that is exempt by this order is being carried out as, or is part of, an undertaking that has an approval or another exemption under the *Environmental Assessment Act*, that project shall be carried out according to the terms and conditions of this order, any approval, and any other order. In the event of a conflict, the Minister of the Environment shall decide how the project is to be carried out. O. Reg. 78/90.

(4) A reference in this Regulation to a column of a category-specific monitoring schedule for a stream is a reference to a column headed by that stream's type. O. Reg. 91/90, s. 1.

#### PURPOSE

2. The purpose of this Regulation is to establish a data base on effluent quality in the Industrial Minerals Sector that will be used, along with other pertinent information, to develop effluent limits for that sector. O. Reg. 91/90, s. 2.

#### APPLICATION

3.—(1) This Regulation applies only with respect to the plants listed in Schedule A and only with respect to the effluent streams on which sampling points are established under section 4.

(2) For the purposes of this Regulation, the plants with respect to which this Regulation applies are divided into categories as set out in Schedule A.

(3) The category-specific monitoring schedule for each plant is as set out in Schedule A.

(4) Sections 3 to 7 of the General Effluent Monitoring Regulation and sections 4 to 14 of this Regulation do not apply in respect of plants in the Non-Monitoring Plants Category.

(5) A direct discharger whose plant is in the Quarries or Sand and Gravel Category who demonstrates to the Director, by means of a written report, that the total volume of effluent discharged from the plant on each day during the period beginning on the 1st day of March, 1990 and ending on the 31st day of May, 1990 is less than 50,000 litres, need not comply with the requirements of sections 3 to 7 of the General Effluent Monitoring Regulation and sections 4 to 15 of this Regulation in respect of that plant.

(6) The report referred to in subsection (5) shall be certified by a professional engineer of the Province of Ontario and shall be submitted by the 30th day of June, 1990.

(7) This Regulation is a Sectoral Effluent Monitoring Regulation within the meaning of the General Effluent Monitoring Regulation.

(8) Each direct discharger shall carry out the monitoring obligations, including the sampling, analysis, toxicity testing, flow measurement, recording and reporting obligations of this Regulation, in accordance with the General Effluent Monitoring Regulation and in accordance with Schedules L and M to this Regulation.

(9) An obligation on a direct discharger to do a thing under this Regulation is discharged if another person has done it on the direct discharger's behalf.

(10) A direct discharger who for any period of time does not discharge an effluent is exempt, for that period, from the requirements of this Regulation that pertain to that effluent.

(11) Subsection 3 (29) of the General Effluent Monitoring Regulation does not apply where a direct discharger is governed by this Regulation.

(12) In addition to complying with subsection 3 (19) of the General Effluent Monitoring Regulation, each direct discharger shall use only sampling equipment for the collection of samples, the wettable surfaces of which are made of fluorocarbon resins, glass, stainless steel, high or low density polyethylene, polyethylene terephthalate, polystyrene or polypropylene for samples that are to be analyzed for parameters in analytical test groups IM1, IM3 and IM4 as set out in Schedule B.

(13) Despite subsection (12), a direct discharger may use sampling devices that contain a short section of surgical grade silicone rubber tubing or other tubing approved by the Director if such tubing cannot be replaced by a material mentioned in subsection (12) without impairing the operation of the device.

(14) Each direct discharger shall collect each sample to be analyzed for the parameter in analytical test group IM2 as set out in Schedule B directly into a plastic container that has never been used before.

(15) For the purposes of subsections 3 (22), (25a) and (26) of the General Effluent Monitoring Regulation,

- (a) a sample collected for analysis for parameters in more than one analytical test group as set out in Schedule B to this Regulation is deemed to be a sample collected for analysis for parameters in more than one analytical test group in Schedule 1 to the General Effluent Monitoring Regulation; and
- (b) a laboratory sample container specified in Column 2 of Schedule L to this Regulation is deemed to be a laboratory sample container specified in Column 2 of Schedule 2 to the General Effluent Monitoring Regulation.

(16) Instead of the minimum sample volumes specified in Column 5 of Schedule L, a direct discharger may, in relation to a sample to be analyzed, submit to the laboratory performing the analysis the minimum sample volume required by the laboratory to meet the analytical method detection limits set out in Column 6 of Schedule M. O. Reg. 91/90, s. 3.

#### SAMPLING POINTS

4.—(1) Each direct discharger shall establish a sampling point on each effluent stream in the discharger's plant, as follows:

1. A cement plant effluent sampling point on each cement plant effluent stream.
2. A lime plant effluent sampling point on each lime plant effluent stream.

3. A graphite plant effluent sampling point on each graphite plant effluent stream.
4. A gypsum plant effluent sampling point on each gypsum plant effluent stream.
5. A magnesium plant effluent sampling point on each magnesium plant effluent stream.
6. A minewater sampling point on each mine-water effluent stream.
7. A quarry water sampling point on each quarry water effluent stream.
8. A storm water sampling point on each storm water effluent stream.
9. A wash water sampling point on each wash water effluent stream.

(2) Each direct discharger shall use the sampling points established under subsection (1) for all sampling required by this Regulation, except that a discharger may use alternate sampling points where that is acceptable to the Director. O. Reg. 91/90, s. 4.

#### SAMPLING PRINCIPLES

5.—(1) In this section, "calculated retention time", in relation to an effluent stream, means the period of time in days that results from dividing the average daily flow, expressed in cubic metres, of that stream from any settling pond into the total available volume, expressed in cubic metres, of the settling pond.

(2) For the purpose of calculating a calculated retention time, each direct discharger shall obtain the average daily flow of a stream by averaging the daily flow of the stream over any thirty operating days.

(3) For the purpose of calculating a calculated retention time, each direct discharger shall measure or estimate the daily flow of a stream at a location or set of locations representative of the flow of the stream, using only methods, devices and calculations that are capable of accuracy to within plus or minus 20 per cent of the actual flow.

(4) For the purposes of this Regulation, a calculated retention time must be calculated on or before the day on which the direct discharger is required to submit an initial report under subsection 14 (1).

(5) Subject to subsections (6) to (9), each direct discharger shall collect each sample required to be collected by this Regulation,

- (a) by one of the means described in clause 3 (4) (a), (c) or (e) of the General Effluent Monitoring Regulation; or
- (b) by taking three equal volume grab samples at intervals of at least two hours over an

operating day and combining them manually.

(6) Where the calculated retention time in relation to an effluent stream from a plant in the Quarries or Sand and Gravel Category is one day or more, a direct discharger may collect each sample required to be collected from that stream as a single grab sample.

(7) A direct discharger may collect each sample required to be collected from a storm water sampling point as a single grab sample.

(8) Subsections (6) and (7) do not apply in respect of samples collected under section 9 or 10.

(9) Where a direct discharger collects a sample for analysis for one or more parameters in analytical test groups 15 to 18 and 28a, as set out in Schedule B, the sample shall consist of three equal volume grab samples taken at intervals of at least two hours over an operating day.

(10) Each direct discharger shall combine grab samples collected as a sample in accordance with subsection (9) for analysis for parameters in analytical test group 15, as set out in Schedule B, in the laboratory immediately before analysis.

(11) Each direct discharger shall combine grab samples collected as a sample in accordance with subsection (9) for analysis for parameters in analytical test groups 16 to 18 and 28a, as set out in Schedule B, in a purge vessel in the laboratory immediately before analysis. O. Reg. 91/90, s. 5.

#### THRICE WEEKLY MONITORING

6.—(1) On three operating days in each week, each direct discharger shall collect a set of samples from each sampling point, other than storm water sampling points, of the discharger, sufficient to perform the analyses required by subsection (3).

(2) Where the calculated retention time, within the meaning of section 5, in relation to an effluent stream from a plant in the Quarries or Sand and Gravel Category is one day or more, a direct discharger may collect a set of samples from the sampling point on that stream on one operating day in each week, instead of at the frequency set out in subsection (1).

(3) Each direct discharger shall analyze each set of samples collected under subsections (1) and (2) for the parameters indicated in the column marked "3W", for the stream from which the set was collected, of the category-specific monitoring schedule for the discharger's plant.

(4) For the purpose of subsection (1), samples collected from a sampling point after the first sample is collected from that sampling point under subsection (1) shall be collected no sooner than twenty-four

hours after the previous sampling under subsection (1) from that sampling point.

(5) For the purpose of subsection (2), samples collected from a sampling point after the first sample is collected from that sampling point under subsection (2) shall be collected no sooner than three days after the previous sampling under subsection (2) from that sampling point. O. Reg. 91/90, s. 6.

#### MONTHLY MONITORING

7.—(1) On one operating day in each month, each direct discharger shall collect a set of samples from each sampling point, other than storm water sampling points, of the discharger, sufficient to perform the analyses required by subsection (2).

(2) Each direct discharger shall analyze each set of samples collected under subsection (1) for the parameters indicated in the column marked "M", for the stream from which the set was collected, of the category-specific monitoring schedule for the discharger's plant.

(3) For the purpose of subsection (1), samples collected from a sampling point after the first sample is collected from that sampling point under subsection (1) shall be collected no sooner than fifteen days after the previous sampling under subsection (1) from that sampling point.

(4) Each set of samples collected under subsection (1) shall be collected on a day on which a sample is collected under subsection 6 (1) or (2) from the same sampling point.

(5) Samples collected under subsection (1) at the plant referred to in Schedule A as the Lime Plant at Spragge, Ontario need not be analyzed for the parameters ammonia plus ammonium in analytical test group 4a as set out in Schedule B.

(6) Samples collected under subsection (1) at a plant in the Chemical Lime Category, other than the plant referred to in Schedule A as the Lime Plant at Spragge, Ontario, need not be analyzed for the parameter copper in analytical test group 9 as set out in Schedule B or for the parameters in analytical test groups 14 and 20 as set out in Schedule B.

(7) Samples collected under subsection (1) at a plant in the Quarries Category, other than the plant referred to in Schedule A as the Traprock Quarry Processing Plant at Havelock, Ontario, need not be analyzed for the parameters in analytical test group 16 as set out in Schedule B. O. Reg. 91/90, s. 7.

#### MONTHLY MONITORING—STORM WATER

8.—(1) On one operating day in each month, each direct discharger shall collect a set of samples from each storm water sampling point of the discharger, sufficient to perform the analyses required by subsection (3).

(2) A direct discharger for a plant in the Clay and Shale Category who has been unable to collect a set of samples from a storm water sampling point at the plant in any month as required by subsection (1), because of insufficient flow throughout the month, shall, as soon as possible, collect a compensating set of samples from that sampling point, on an operating day on which a set of samples is not collected under subsection (1) from that sampling point, sufficient to perform the analyses required by subsection (3).

(3) Each direct discharger shall analyze each set of samples collected under subsections (1) and (2) for the parameters indicated in the column marked "M" for the stream from which the set was collected, of the category-specific monitoring schedule for the discharger's plant.

**ORDER MADE UNDER THE  
ENVIRONMENTAL ASSESSMENT ACT**

**EXEMPTION—MINISTRY OF THE  
ENVIRONMENT—MOE-31/2**

Having received a request from the Regional Director, West Central Region, Ministry of the Environment, that an undertaking, namely:

The activity of managing the contaminated wastes which may be found in the soil and groundwater both in and around the property of Chemical Waste Management Limited at Site 7, Lot 6, Concession 9, Smithville Industrial Park, Township of West Lincoln, Regional Municipality of Niagara, which management activities involve an ongoing securing and control of contaminated wastes, destruction of secured PCB wastes, remediation of contaminated ground-

water and bedrock, and the off-site disposal of contaminated wastes which may not be suitable for destruction,

be exempt from the application of the Act pursuant to section 29; and

Having been advised by the Regional Director, West Central Region, Ministry of the Environment, that if the undertaking is subject to the application of the Act, the following injury, damage or interference with the persons and property indicated will occur:

- A. The time which would be involved in preparing an Environmental Assessment and seeking approval under the Act would significantly delay the implementation of the undertaking exacerbating the following situations:
- (i) Contaminants from the site have gained access to groundwater. An aquifer, located in close proximity to the site, is a source of water supply to local area residents. The aquifer has been contaminated, thereby potentially threatening the health of the local area residents, and impairing a resource which was being used as a source of water supply to the Community of Smithville;
  - (ii) Surface and groundwater flows discharge to Spring Creek and then to Twenty Mile Creek, a major watercourse in the area. Since contaminant inputs, such as PCBs bio-magnify through the food chain, failure to take action may result in the contamination of the aquatic life of Spring Creek and Twenty Mile Creek; and
  - (iii) Members of the public may be exposed to contaminants as the community uses surrounding areas for recreational or other public activities.

Having weighed such injury, damage or interference against the betterment of the people of the whole or any part of Ontario by the protection, conservation and wise management in Ontario of the environment which would result from the undertaking being subject to the application of the Act;

The undersigned is of the opinion that it is in the public interest to order and orders that the undertaking is exempt from the application of the Act for the following reasons:

- A. The tasks involved in managing the contaminated waste can be commenced immediately. This will result in minimizing the

potential for the injury and damage which are cited above.

- B. The public and the Municipality are anxious that the undertaking be implemented as soon as possible to avoid further potential public exposure to, and off-site migration of, subsurface contaminated wastes.
- C. The Ministry of the Environment and the Municipality are negotiating an agreement with respect to how the cleanup and storage of PCB waste shall proceed, which when finalized will be filed with the public records maintained under section 31 of the Act by the Environmental Assessment Branch of the Ministry of the Environment at its main office.
- D. A Liaison Committee with representatives from the local citizens has been established to monitor progress made in the cleanup of the site and eventual disposal of the contaminated wastes.
- E. The various instructions, approvals and orders which may be issued under the *Environmental Protection Act* and the *Ontario Water Resources Act* will result in the management activities being carried out in a safe manner.
- F. It is necessary to replace exemption order MOE 31/1 because the date for terminating storage of liquid PCB wastes in that order has elapsed, while approvals for the destruction of PCB wastes are still in the course of being obtained.

This exemption is subject to the following terms and conditions:

- 1. No wastes other than contaminated soil, water or other materials from the management activities being carried out under this Order shall be brought to the site.
- 2. This undertaking involves the management of wastes, including:
  - (a) Cleaning up the site and immediately surrounding area and bedrock;
  - (b) Destroying, by approved mobile incineration facilities, PCB waste stored at the site;
  - (c) Decontaminating PCB contaminated soils and possibly bedrock, and subsequently redepositing them;
  - (d) Storing, temporarily, in existing or new structures, any waste that cannot be destroyed or decontaminated on the property until it can be

removed to other certified waste disposal sites when they become available; and

- (e) Offering first Right of acquisition of the property to the Corporation of the Township of West Lincoln once the site has been restored to a clean condition so that it may be used for the originally intended use.
- 3. The principal activities associated with the undertaking include the following:
    - (a) Acquisition, through ownership by the Province of the property formerly used by Chemical Waste Management Limited at the Smithville Site and acquisition of the right to use any necessary adjacent property;
    - (b) Consolidation of the wastes, including: contaminated soils, contaminated equipment and materials associated with ongoing cleanup activities at the site;
    - (c) Destruction of PCB wastes by means of approved facilities;
    - (d) Construction and preparation of a waste water treatment facility for treatment of contaminated water, as an initial short term remedial activity;
    - (e) Trial excavation of the bedrock and selection and implementation of the appropriate technology for remediation of the contaminated groundwater and bedrock;
    - (f) Removal from the site of any wastes that cannot be destroyed or decontaminated; and
    - (g) Continuation of an appropriate groundwater monitoring program.
  - 4. This Order does not apply to the storage of PCB wastes on the site after July 31, 1991.
  - 5. The Liaison Committee referred to in reason D and the Municipal Council shall be consulted and kept advised with respect to the details of the undertaking as they are developed and progress is made in their implementation.
  - 6. The undertaking shall be monitored by the Ministry of the Environment and/or its agents, to ensure that the waste management activities do not result in injury or damage to persons and property.

7. A written report shall be prepared on the undertaking and updated annually over the period in which the contaminated wastes are managed. The report shall describe the activities and the results of the ongoing monitoring program and how the terms and conditions of this Order are being complied with. The report shall be submitted by the Regional Director, West Central Region of the Ministry of the Environment to the Director of Environmental Assessment Branch for filing in the public records.

Exemption Order MOE-31/1 filed as O. Reg. 16/89 is terminated and replaced hereby. O. Reg. 101/90.

## ENVIRONMENTAL ASSESSMENT ACT

### O. Reg. 102/90.

Exemption—Ministry of the  
Environment—MOE-42.

Made—February 23rd, 1990.

Approved—February 23rd, 1990.

Filed—March 2nd, 1990.

## ORDER MADE UNDER THE ENVIRONMENTAL ASSESSMENT ACT

### EXEMPTION—MINISTRY OF THE ENVIRONMENT—MOE-42

Having received a request from the Regional Director of the West Central Region of the Ministry of the Environment, that an undertaking, namely,

activities related to the fire-fighting, clean-up and/or remedial work at or associated with the Tyre King Tyre Recycling Limited Facility located in the former Township of Walpole, in the City of Nanticoke in the Regional Municipality of Haldimand-Norfolk,

be exempt from the application of the Act pursuant to section 29; and

Having been advised by the Regional Director of the West Central Region of the Ministry of the Environment that if the undertaking is subject to the application of the Act, the following injury, damage or interference with the persons and property indicated will occur:

- A. This exemption applies to an emergency situation which presents an immediate threat or danger to public health or safety or to the environment.
- B. The time required to prepare an environmental assessment and seek approval under the *Environmental Assessment Act* would significantly delay the implementation of the undertaking, thereby exacerbating the threat or danger to public health or safety or to the environment.

Having weighed such injury, damage or interference against the betterment of the people of the whole or any part of Ontario by the protection, conservation and wise management in Ontario of the environment which would result from the undertaking being subject to the application of the Act;

The undersigned is of the opinion that it is in the public interest to order and orders that the undertaking is exempt from the application of the Act for the following reason:

- A. The activities involved in the undertaking will result in minimizing the potential for the injury and damage which are stated above.

This exemption is subject to the following terms and conditions:

1. Where an undertaking, which is being carried out under this exemption order, is the subject of another exemption order or is an undertaking for which an environmental assessment has been accepted and approval to proceed received, the undertaking shall be subject to the terms and conditions of this exemption order, and any other terms or conditions of an exemption or approval shall not apply.
2. A report, describing the activities carried out as a part of any clean-up and/or remedial work which is carried out under this exemption order, shall be prepared by the Director of the West Central Region of the Ministry of the Environment and this report shall be filed with the Director of the Environmental Assessment Branch for filing on the public record, within six months of the completion of such work. (4) If a property in the area to be annexed to the Village of Killaloe is severed or subdivided during the phase-in period, the tax differential shall be allocated to each of the divided parts of the property in the same proportion as the assessment of each part bears to the aggregate of all of the assessments making up the original property but in no case shall the total of the tax differential be increased.

(5) If taxes on a property within the area to be annexed to the Village of Killaloe are reduced in any

year during the phase-in period, the tax differential established under section 11 shall not exceed the taxes payable and the treasurer of The Corporation of the Village of Killaloe shall reduce the tax differential in that year by the amount by which the tax differential exceeds the tax payable.

- (a) in respect of a board appointed under section 70 of the Act, “current cost of operating” does not include current expenditure for furniture and equipment and for debt charges, and
- (b) if a board has entered into an agreement under subsection 165 (2) of the Act that provides for a payment by the Crown in right of Canada to provide classroom

accommodation for a specified number of pupils, the P.A.C. for each such pupil, shall be zero;

“high cost program” means,

- (a) a special education program, other than a program provided in the board’s school in lieu of an education program provided by a provincial school for the blind and the deaf or other similar program for which a general legislative grant is payable, or
- (b) a program that includes technological studies that qualify for one or more credits toward the secondary school graduation diploma or Ontario secondary school diploma;

“technological studies” means, the courses developed from curriculum guidelines that are issued by the Minister for the intermediate division and senior division and listed under the heading “Technological Studies” in the circular entitled “Ontario Schools Intermediate and Senior Divisions Program and Diploma Requirements” issued by the Minister. O. Reg. 142/90, s. 1.

2.—(1) This Regulation applies to fees for pupils in respect of the year 1990.

(2) The fees of a board that provides instruction for one or more pupils in respect of whom fees are receivable shall be calculated under this Regulation separately for elementary school purposes and for secondary school purposes. O. Reg. 142/90, s. 2.

3.—(1) Except as provided in section 4, the fee in respect of a pupil whose fee is receivable from another board, from Canada or from a band, council of a band or education authority authorized by the Crown in right of Canada to provide education for Indians or for a pupil to whom subsection 48 (6) of the Act applies, shall be calculated by,

  - (i) calculated under section 2 of Ontario Regulation 127/85 (Calculation of Average Daily Enrolment), and

- (ii) calculated under section 4 of Ontario Regulation 127/85 (Calculation of Average Daily Enrolment) in respect of a course of study acceptable to the Minister that the board is authorized or required to provide in its day school program in grades 1 to 8; and

- (b) multiplying the A.D.E. of the pupil to whom subsection 48 (6) of the Act applies or the A.D.E. of the pupil whose fee is receivable from another board, from Canada or from a band, council of a band or education authority, as the case may be, by the sum of,

- (i) the amount determined under clause (a), and
- (ii) the P.A.C. for such pupil.

(2) Subclause (1) (b) (ii) does not apply to a board that is appointed under section 70 of the Act.

(3) The fee in respect of a pupil referred to in subsection (1) who is enrolled in a Native language program and whose fee is receivable from Canada or from a band, council of a band or education authority authorized by the Crown in right of Canada to provide education for Indians may be increased by an amount equal to the portion of the eligible sum for Native as a second language that would be generated for such pupil if the pupil were a resident pupil of the board.

(4) The fee in respect of a pupil referred to in subsection (1) who is enrolled in a high cost program may be increased by multiplying the fee by a factor agreed upon by the board and party from whom the fees are receivable when,

- (a) the ratio of the A.D.E. of such pupils registered in a high cost program for whom fees are receivable by the board from such party to the A.D.E. of pupils enrolled in such high cost program conducted by the board,

is greater than,

- (b) the ratio of the A.D.E. of such pupils for whom fees are receivable by the board from such party to the A.D.E. of pupils enrolled in schools operated by the board.

(5) If under this section the board that provides the instruction and the other board or party concerned cannot agree upon a factor, the factor shall be determined by three arbitrators.

4. The fee in respect of a pupil enrolled in a school operated by a board that is appointed under section 70 of the Act in a centre for the treatment of cerebral palsy, a crippled children's treatment centre, a hospital or a sanatorium shall be calculated by,

- (a) adding to the current cost of operating of the board that provides the instruction, the portion approved by the Minister for grant purposes of the expenditure for such year for the transportation of pupils and deducting from the total thereof the general legislative grants payable to the board for such year, except a grant that is equal to the cost of education;
- (b) dividing the amount determined under clause (a) by the sum of the days on which each pupil is enrolled at the school; and
- (c) multiplying the amount determined under clause (b) by the number of days for which the pupil whose fee is being calculated is enrolled at the school. O. Reg. 142/90, s. 4.

by,

- (B) the A.D.E. of the board for the year that is in respect of resident-internal pupils of the board, and

(ii) the P.A.C.

(5) If a pupil is enrolled in a high cost program the amount calculated under subsection (4) may be increased by an amount that takes into account the additional cost to the board of providing the high cost program. O. Reg. 142/90, s. 5.

6.—(1) The fee in respect of a pupil whose parent or guardian does not reside in Ontario shall be such fee as the board providing the instruction to the pupil may determine and, except as is provided in subsection (3), shall not exceed the product obtained by multiplying one-tenth of the sum of the quotient determined under clause 3 (1) (a) and the P.A.C. for the pupil by the number of months during which the pupil is enrolled in such year in a school operated by the board.

(2) Subsection (1) does not apply to a pupil to whom subsection 48 (6) of the Act applies.

  - (a) the disposition applicant, and any party that has raised concerns, will be notified in writing, that the proposed project will be referred to the Ministry of the Environment for consideration and may ultimately be subject to the Act;
  - (b) the notification under clause 4 (a) shall describe the manner in which such a project may become subject to the Act and the prohibitions attached to the proposed activity when referred to the Ministry of the Environment should the project become subject to the Act before the disposition is granted;
- (c) at the time of giving the notification under clause 4 (a), the Ministry of Natural Resources shall advise the Director of the Environmental Assessment Branch and the appropriate Regional Director of the Ministry of the Environment, in writing, of the notice, and provide these Directors with the following additional information: the purpose, location, and description of the proposed project, expected significant adverse environmental effects, proposed mitigation measures, the identity or description of any affected agencies and members of the public with concerns, the concerns with respect to the proposed project, and any proposed means of addressing the concerns; and
  - (d) any additional comments or information received following notification pursuant to clause 4 (c) shall be forwarded to the above Directors.
5. Within forty-five days of the Director of the Environmental Assessment Branch of the Ministry of the Environment receiving a notice as described in clause 4 (c), and, after consultation with the Ministry of Natural Resources, the Director will, by written notice to the Ministry of Natural Resources and the disposition applicant which outlines the reasons, advise:
  - (a) that the Ministry of the Environment does not intend to seek designation of the project in connection with the proposed disposition, in which event the Ministry of Natural Resources may proceed with the disposition;
  - (b) that the Ministry of the Environment intends to seek designation of the project in connection with the proposed disposition, in which event the disposition shall not be granted under this order until approval to proceed with the project is granted; or
  - (c) that the Ministry of the Environment is considering the application of clause 5 (b) to the project, in which event a specified time for a decision on designation, as described in clause 5 (a) or 5 (b), will be set out, from time to time, by notice to the Ministry of Natural Resources, and the forty-five-day period shall be extended accordingly.

6. Where Conditions 2, 3, 4 or 5 apply, MNR may not proceed with the disposition except as set out therein.
7. Where the Minister of the Environment is considering the matter, and written notice of a decision on designation has not yet been provided to the Ministry of Natural Resources and the disposition applicant under Condition 5,
- the Ministry of the Environment may give such further notices to the public and other individuals or agencies who might be affected by the disposition or undertake other public consultation as it deems appropriate;

  - determine the form of any notice issued in regard to the dispositions and who is to receive such notice.
11. Notwithstanding any of the foregoing, the Minister of the Environment may recommend to the Lieutenant Governor in Council the designation of any project as a major commercial or business enterprise or activity or proposal, plan or program in respect of a major commercial or business enterprise or activity which shall be subject to the Act.
12. This order does not exempt a disposition activity to a disposition applicant whose proposed activity is subject to the Act (or would be so subject except for another exemption), unless the disposition applicant has complied with the provisions of the Act (including any provisions of an approval or other exemption), which apply to the disposition applicant with respect to the proposed activity, in which case, the disposition is not subject to Conditions 2 to 8 of this order.
13. Where a disposition which otherwise would be exempt under this order is being carried out in connection with, or is part of, an undertaking, for which an environmental assessment has been done and approval to proceed received, the disposition shall not be exempt under this order but shall be carried out in accordance with the approval to proceed; and where the reasons for a condition of approval issued to the Ministry of Natural Resources indicate the approval should apply to particular dispositions, such dispositions shall not be exempt hereunder.

1. In the year 1990, for the period commencing the 6th day of April, 1990 and ending on the 31st day of December, 1990, the amount of taxes for local purposes on the residential assessment of each property shall be calculated by multiplying the 1990 mill rate for the Town of Port Hope for local purposes by the residential assessment on that property, as shown on the assessment roll for the Town of Port Hope prepared in accordance with subsection 8 (1), and subtracting therefrom 100 per cent of the tax differential established under section 10 and multiplying the result of the above calculations by .75.
2. In the year 1991, the amount of taxes for local purposes on the residential assessment of each property shall be calculated by mul-

tiplying the 1991 mill rate for the Town of Port Hope for local purposes by the residential assessment on that property, as shown on the last revised assessment roll for the Town of Port Hope for the 1991 tax year, and subtracting therefrom 85 per cent of the tax differential established under section 10.

3. In the year 1992, the amount of taxes for local purposes on the residential assessment of each property shall be calculated by multiplying the 1992 mill rate for the Town of Port Hope for local purposes by the residential assessment on that property, as shown on the last revised assessment roll for the Town of Port Hope for the 1992 tax year, and subtracting therefrom 65 per cent of the tax differential established under section 10.
4. In the year 1993, the amount of taxes for local purposes on the residential assessment of each property shall be calculated by multiplying the 1993 mill rate for the Town of Port Hope for local purposes by the residential assessment on that property, as shown on the last revised assessment roll for the Town of Port Hope for the 1993 tax year, and subtracting therefrom 45 per cent of the tax differential established under section 10.
5. In the year 1994, the amount of taxes for local purposes on the residential assessment of each property shall be calculated by multiplying the 1994 mill rate for the Town of Port Hope for local purposes by the residential assessment on that property, as shown on the last revised assessment roll for the Town of Port Hope for the 1994 tax year, and subtracting therefrom 25 per cent of the tax differential established under section 10.
6. In the year 1995, the amount of taxes for local purposes on the residential assessment of each property shall be calculated by multiplying the 1995 mill rate for the Town of Port Hope for local purposes by the residential assessment on that property, as shown on the last revised assessment roll for the Town of Port Hope for the 1995 tax year, and subtracting therefrom 5 per cent of the tax differential established under section 10.

10.—(1) In this section,

“town assessment” means the residential assessment on a property as shown in the assessment roll prepared in accordance with subsection 8 (1); and

“township assessment” means the residential assessment on that property prepared by the assessment commissioner in 1989 for the 1990 tax year, as adjusted by such additional assessments as have been made under section 32 or 33 of the *Assessment Act* in respect of the 1990 tax year, as

the assessment existed on the day before the date of annexation.

(2) In the year 1990, the treasurer of The Corporation of the Town of Port Hope shall establish a tax differential for each property in the area to be annexed to the Town of Port Hope by calculating the product of the 1990 mill rate for the Town of Port Hope for local purposes and the town assessment for that property and subtracting therefrom the product of the 1990 mill rate for the Township of Hope for local purposes and the township assessment on that property.

11.—(1) In this section, “phase-in period” means the 6th day of April, 1990 to the 5th day of April, 1995, inclusive.

(2) If two or more properties in the area to be annexed to the Town of Port Hope are consolidated during the phase-in period, the tax differentials for those properties shall be consolidated to establish a new tax differential for the consolidated property.

(3) If the total residential assessment of the consolidated property is less than the aggregate of the residential assessments on the constituent properties, the new tax differential shall be diminished in the same proportion and at the same time as the total residential assessment is diminished.

(4) If a property in the area to be annexed to the Town of Port Hope is severed or subdivided during the phase-in period, the tax differential shall be allocated to each of the divided parts of the property in the same proportion as the residential assessment of each part bears to the aggregate of all of the residential assessments making up the original property at the time of the division of that property but in no case shall the total of the tax differential be increased.

(5) If taxes on a property within the area to be annexed to the Town of Port Hope are reduced in any year during the phase-in period, the tax differential established under section 10 shall not exceed the taxes payable and the treasurer of The Corporation of the Town of Port Hope shall reduce the tax differential in that year by the amount by which the tax differential exceeds the tax payable.

14. The Corporation of the Town of Port Hope shall not apply for a further change to the mutual municipal boundary of the Town of Port Hope and the Township of Hope before the 6th day of April, 2010 unless the council of The Corporation of the Township of Hope agrees, by council resolution, to the application before the application is submitted.
